

230J Junior Tender

Hypalon Inflatable with wooden transom

A compact versatile tender suitable for rowing or a small outboard. The raised floor gives a catamaran effect which improves rowing and towing. The gradual bow rise deflects spray down giving a soft dry ride. Large diameter tubes ensure excellent stability while Lancer's unique rounded stern maximises internal room and stowability.

Tube fabric

Longer lasting Hypalon fabric.

Hull or Board material

Raised fabric floor with internal plywood floor (sprayed with epoxy paint).

Standard Equipment

Carrying handles, rowlocks, oars, chaffing strips under tubes and transom, towing point, bellows, repair kit, operation manual, hinged ply floor, rowing thwart, carry bag.

Optional equipment

Spray dodger, davit lifting system.
